🔗 LeetCode

Technical Skills

Proficiencies: Data Structures & Algorithms, Full-Stack Development, Object Oriented Programming

Languages: C++, C, Python, Javascript, Typescript, Node.js, HTML, CSS, Java

Frameworks & libraries: React.js, Next.js, Redux, TailwindCSS, Spring, Spring Boot

Database : MongoDB, PostgreSQL, SQL

Technologies : GitHub, Git

Education

MIT Academy of Engineering

2023 - Present

Bachelor of Technology in Computer Engineering

CGPA of 8.60

MIT Jr. College, Barshi

2022 - 2023

Higher Secondary (12th Grade)

Percentage 81.00%

Maharashtra Vidyalaya, Barshi

2020 - 2021

Secondary (10th Grade)

Percentage 95.40%

Experience

Workable

Remote

Full Stack Developer Intern

Jul 2025 – Present

- Worked across multiple full-stack features, handling both **React.js frontend** and **Node.js backend** development for different internal and client projects.
- Focused on writing clean, maintainable code by following practices like clear **naming conventions**, organized **folder structure**, reusable components, and modular backend APIs.
- Implemented and improved features while ensuring clean and maintainable code.

Projects

BL Sheet | Project Management Service (Team Project)

Oct 2024

TypeScript, React.js, Node.js, Tailwind CSS, AWS, Shadcn UI

Live Demo

- Worked with a team and build a full-stack project management platform where users can create tasks, track progress, and collaborate in real time.
- Focused on the **Tasks and Assessment modules** — built and managed backend APIs, handled data flow, and worked on both frontend and backend parts to keep everything connected smoothly.

Code Mitra | Online Course Hub

Nov 2024

React.js, Node.js, Express, MongoDB, Tailwind CSS, Ant Design, Shadcn UI

Live Demo

- Built an online learning platform similar to Udemy, where instructors can create and publish courses, and students can explore and purchase them.
- Developed backend **REST APIs** for course creation, enrollment, and user management, and integrated them with a dynamic React frontend.

Work-Orbit | Freelance Bidding Platform (Team Project)

Jun 2025

React, TypeScript, Spring Boot, PostgreSQL, GitHub, Netlify, Render

Live Demo

- Developed a full-stack **freelancing platform** where clients can post projects, and freelancers can bid, collaborate, and receive secure payments.
- Handled the complete **freelancer side** — built the bidding system, implemented an **escrow-based payment method**, and managed both frontend and backend workflows.

Achievements & Extracurricular

Web crafter competition

- Won 1st Prize in web development competition by Knowledge Network Club of MIT Academy Of Engineering.

Student of the Year - Junior College (2023)

- Awarded the prestigious **Student of the Year** title for consistently demonstrating excellence in academics, **dedication**, and extracurricular activities.
